Fire Suppression Solutions

Pirtek offers design, installation, commissioning and maintenance of Fire Suppression solutions for mobile equipment for your industry.

Our Focus is Service... Guaranteed!

Are your staff, equipment and operation compromised?

Combining any of these three elements can cause serious threats to your company

Flammable Substances

- Diesel Fuel • Engine Oils
- Hydraulic Fluids

Combustible Material

- Coal Dust • Wood Chips
- Paper Dust

Super Heated Surfaces

- Hydraulic Components
- Turbo Chargers • Exhausts

Don't Risk the loss of lives, equipment, compliance and productivity

Pirtek has the solution for the Fire Protection needs in your mobile equipment, backed up by the largest network in Australia.

Our Focus is Service... Guaranteed!

Since 1980 and with over 95 locations nationally, Pirtek has continuously been growing our products and services to exceed the increasing need in our market.

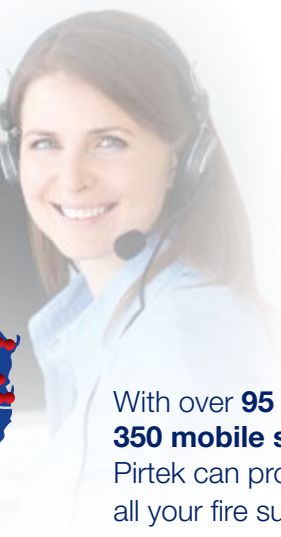

With over 350 Mobile Service Units on the road, we provide the highest quality global standards through a national network with our local presence.

Our fire suppression range used in the mining industry for over a decade, is an **Australian made product** and has been proven to cope with our harsh Australian conditions.

With an innovative approach in the design, and quality manufacturing of our components, Pirtek Fire Suppression Systems are simpler to service and maintain, saving our customers valuable time and money.

The suppressing agent in our system is biodegradable, environmentally friendly and is accredited to meet Australian Standard AS5062.

Our exclusive automated notification system identifies the requirement for your next service and notifies your nearest Pirtek centre. Upon notification, one of our friendly customer support staff will be in touch to arrange the service of your Pirtek Fire Suppression System.

With over **95 centres** and **350 mobile service units** on the road, Pirtek can provide the rapid response for all your fire suppression requirements.

**Green Agent
Technology™**

Pirtek Fire Suppression Systems use the biodegradable and environmentally formulated Aqueous Film-Forming Foam (AFFF) FireAde 2000.

- 98% Organic Compound
- Contains no PFOA or PFOS
- Zero Hazardous Chemicals
- Encompasses Water Based & Food Grade Ingredients
- Listed in ActivFire as AS5062 compliant

Customised Product Solutions

Present in the Australian market for over a decade, Pirtek has partnered with Fire Protection innovators QTEC Fire to provide the highest quality components

The components in our systems are designed and manufactured in Australia with computerised numerical control precision to achieve the reliability our customers expect from our products.

Methodical quality control procedures are followed right at the manufacturing facility, ensuring that every valve is tested before it leaves the building.

Manual activation

Located at the Operator's reach to manually activate the system.

System control panel

Alerts and monitors the system status plus initiates engine shutdown sequence.

Distribution Network

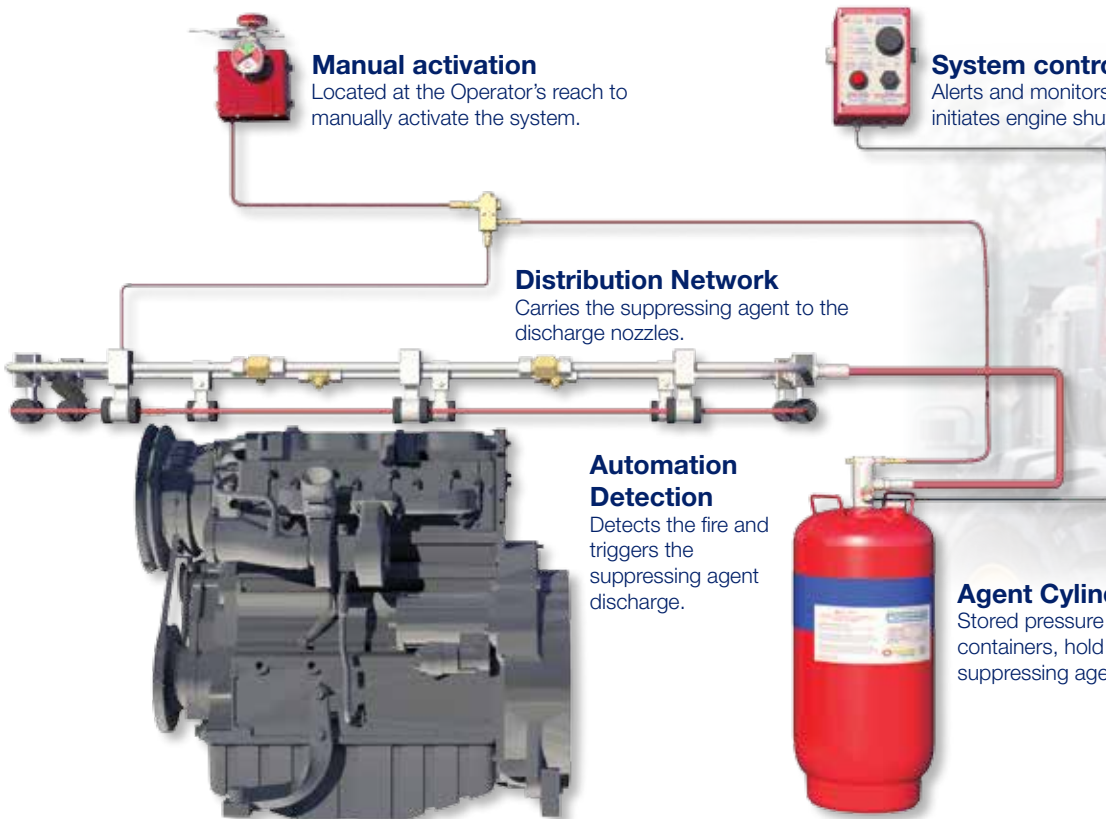

Carries the suppressing agent to the discharge nozzles.

Automation Detection

Detects the fire and triggers the suppressing agent discharge.

Agent Cylinder

Stored pressure containers, hold the suppressing agent.

Complimentary Solutions to suit your needs

Compact System Solutions

In addition to our main AS5062 compliant system offering, Pirtek also offers a compact alternative of the Highest Quality. Swedish manufacturer of fire systems for mobile equipment DAFO is available through the Pirtek network in Australia

These AFFF systems represent a great compact alternative for small to medium machines where space is limited. Forklifts, Reach Stackers, Drill Rigs or Skid Steer loaders just to name a few, are perfect candidates for these systems. However, larger mining machines benefit from its versatility as well.

Portable Fire Extinguisher Solutions

Pirtek supply, inspect and re-certify portable fire extinguishers in mobile and transportable equipment.

Technical Training Solutions

Pirtek Fluid Systems uses a combination of interactive e-Learning modules with monthly practical sessions at our National Office.

Our centres are up to date with the latest developments in our Fire Suppression range.
